

## **YELLOW ACTIVITY MONITORING SYSTEM**

# **LATEST DEVELOPMENTS**

Kinetic Electronic Designs has released a new range of vehicle monitoring products and a cloud-based software solution for enhanced fleet management.

The VR903 range of Activity Recorders complements the field-proven VR272 product line. All VR903 Activity Recorders include:

- Multi-constellation GPS vehicle movement tracking
- Activity recording functionality during standby (engine-off) periods
- Monitoring of primary and secondary vehicle engines
- External event monitoring
- Manual data download facilities
- Optional automatic data download facilities
- Automatic, seamless in-field functionality upgrading
- Rugged, weather-proof and dust-proof construction
- Tamper-proof, encrypted data recording and transfer
- Ease of installation
- Future-proofed through model upgrade and expansion options

VR903 Activity Recorder model variants and add-on options include

- Automatic near real-time data reporting, charting and mapping
- Work classification (e.g. type, customer, cost-code, project etc)
- Operator identification through in-vehicle time-clocking
- Information availability through a large, clear display
- Supplementary user-data entry (e.g. fuel filling, odometer, drilling data)

Cloud-software features include

- Unified management of multiple vehicle types
- Centralised monitoring of distributed operations and sites
- Supports any mixture of VR272 and VR903 Activity Recorders
- Easy and flexible configuration of fleet vehicle allocations
- A wide range of reports and charts
- Mapping reports including speed, trips/routes, stops, geo-fence monitoring
- Micro and macro data access
- Multi-user access control and configuration audit tracking
- Secure data storage
- Multi-time zone and multi-language capabilities
